11 of 12 review helpful OK book By GARY M LABELLA The first couple of chapters gave a very good overview of the canyon formation good to know tourist information for the backpacker and a map Unfortunately I found the map difficult to read because of the colors used to format it I was also hoping for more depth and discussion about the various trails from the South Rim to the river This is a well rounded book It d Fully updated and expanded this new edition of the ever popular Sierra Club Totebook is an information packed guide to America s best known national park destination of over four million visitors annually Annerino offers seasoned advice on lodging hiking equipment and technique safety weather and clothing food requirements map selection and wilderness ethics 13 photographs Available now the all new Hiking the Grand Canyon and new waterproof nbsp fold out trail map by John Annerino from Skyhorse Publishing From the Author Available now the all
