4 of 7 review helpful An enjoyable little book on trips to the Grand Canyon By Eric Blievernicht I wasn't expecting much from this book so I was pleasantly surprised I was afraid the funny stories would turn out to not translate well to text Well I guess you had to be there The book is fun light reading interspersed with casual discussion of the geology and formation of Grand Canyon layers and the canyon itself a What started as informal treks to the awesome splendor of the Grand Canyon by members of the Institute for Creation Research has grown into a popular excursion for many across the country from all backgrounds Dr Larry Vardiman recounts his memorable trips to this evidence for a worldwide flood as he leads groups of adventurous tourists up and down the craggy cliffs Written with humor this book also points to a reverence for God's Word By balancing the rugged beauty About the Author Vardiman has conducted research for the U.S. Air Force Colorado State University the Department of Interior and the Institute for Creation Research in the field of cloud physics and climate change for thirty five years
