2 of 2 review helpful Recommended By WayneChicago Very pleased with this book It's more recent than most other options of which I studied several for my upcoming days of hiking while visiting Tempe AZ Although I do not have the other books for direct comparison I can attest to the fact that this book is well written has great descriptions appears to include all the major and minor places in greater Phoenix that I With more than 4 million people the Phoenix metropolitan area is one of the country's largest Surprisingly it's also one of the most diverse and dramatic for hikers with scenic destinations ranging from area parks greenbelts and preserves to high and low deserts and breathtaking mountains This easy to use guide features the best scenic day hikes determined by author Charles Liu using state of the art GPS technology These hikes are geared to every skill level Liu leads hikers and walkers through a diverse collection of superb trails perfect for hikers of all experience levels NorthCentralNews net
