0 of 0 review helpful Grand Canyon Map By M Hobin This was a very detailed map as far as topography goes it did show a lot of valuable info regarding the park and is a useful travel companion to those venturing to that fantastic scenic wonder I think hikers would find this map useful in particular On the downside it does not show enough detail or provide quite enough info about the various roadways and drives in par Designed for the tourist the traveller or the trekker each title features a detailed map with dramatic shaded relief printer on 100 plastic coupled with a mini guidebook attached to a protective cover Includes park roads trails and points of interest suggested itineraries visitor services scenic photos and descriptions of park ecology and geology
